

Regulatory Information Sheet

UV- and electron beam curing printing inks

EuPIA Charter on Raw Material Selection and Exclusion for Printing Inks and Related Products

The formulation of our products is in accordance with the „EuPIA Charter on Raw Material Selection and Exclusion for Printing Inks and Related Products“ (<http://www.eupia.org>).

REACH Regulation (EC) No 1907/2006: SVHC

The products listed above do not contain any of the substances mentioned in the SVHC candidate list (REACH Regulation (EC) No 1907/2006 Article 59 (1,10)) as a constitutional component. (Available at the European Chemical Agency in Helsinki (ECHA) <https://echa.europa.eu/candidate-list-table>). However, traces of the substances (<0.1% (w/w)) in the products cannot be ruled out due to impurities released by technical processes.

REACH Regulation (EC) No 1907/2006: Status of registration

All substances are registered or exempt.

REACH restriction of synthetic polymer microparticles (Entry 78 of Annex XVII REACH, as introduced by Commission Regulation (EU) 2023/2055)

If present in the product, refer to Section 15 of the relevant safety data sheets for information on synthetic polymeric particles (SPM).

TPHC (formerly CONEG) and Directive 94/62/EC

The limits for the heavy metals lead, cadmium, mercury and chromium (VI) stipulated in the "Model Toxics in Packaging Legislation" of the TPHC are met. With regard to the trace contents of the four heavy metals, we can refer to the statements of our suppliers. According to our supplier's statements, the sampling inspections have shown that the sum of the total contents of the four heavy metals, corresponding to 100 ppm, has established that the limits are not only kept, but that the values even fall below.

PPWR: Regulation (EU) 2025/40 on packaging and packaging waste

The heavy metals lead, cadmium, mercury, and chromium (VI) and per- and polyfluoroalkyl substances (PFAS) are generally not used as constitutional components in our products. The limit values of Regulation (EU) 2025/40 for heavy metals Art. 5 (4) and per- and polyfluoroalkyl substances (PFAS) Art. 5 (5) are complied with.

Regulatory Information Sheet

UV- and electron beam curing printing inks

ROHS: Directive 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment

The heavy metals lead, cadmium, mercury, chrome (VI) and the substances PBB, PBDE, DEHP, BBP, DB and DIBP (DIRECTIVE 2011/65/EU) are no constitutional components in our products.

VOC content

The products mentioned above not contain any volatile solvents as defined by the 31st Ordinance for the Implementation of the Federal Immission Control Act (implementation of Directive 2010/75/EU of 17 December 2010).

Conflict minerals

The products listed above not contain any conflict minerals according to regulation (EU) 2017/821 as a constitutional component.

In addition, the printing inks do not contain conflict minerals according to the Dodd–Frank Wall Street Reform and Consumer Protection Act as constitutional component.

Code of Conduct

Jänecke+Schneemann Druckfarben GmbH is a member of the BME Code of Conduct and accepts and supports the BME Code of Conduct in the supply chain.

ISO 9001

Our manufacturing location is certified according to DIN EN ISO 9001.
